SACRED GEOMETRY Dates: September 1 Days: Saturday Time: 10 a.m. to 2 p.m. Instructor: Sandy March Fee: \$39 Location: Shields 107

Sacred geometry has existed in many forms across the ages. The word 'Geo-metry' comes from the Greek words Geos meaning 'Earth' and Metron meaning 'To measure', which together literally translate as the 'Measuring of the earth' or 'Earthly measurements', an art which was traditionally restricted to the priest-hood. Sacred geometry

involves sacred universal patterns used in the design of everything in our reality, most often seen in sacred architecture and sacred art. The basic belief is that geometry and mathematical ratios, harmonics and proportion are also found in music, light, cosmology. This value system is seen as widespread even in prehistory, a cultural universal of the human condition. In this class we discuss what sacred geometry is and how it affects your everyday lives, within our home, work place, music, our bodies and much more. We will learn how to transmute the negative effects in our daily surroundings using sacred geometry. Requirements: Pendulum if you have one. Pendulums will be available to borrow or purchase at the class as well.
